

DESIGN PROFESSIONALS

Mechanical and Electrical Professionals

National CAD Services has been meeting the needs of the design community since 1992. We continue to develop innovative ways to produce a better product for the best price. A brief description of services that have benefited our clients from our dedication to quality and accuracy:

Mechanical and Electrical engineers:

NCS has qualified CAD Specialists with experience in producing mechanical and electrical drawings on CAD to assist Engineers with their projects. From the design phase to final permit sets we can create the M&E documents to your specifications. We provide M&E documents for commercial, industrial and retail projects ready for permits and bids. We charge a range of hourly rate for these services. We can discuss the level of involvement in order to determine an estimated cost to complete each project. Many projects have different levels of complexities and detailed information; these roles can also be defined to insure a successful conclusion to the project.

Many services include; field measuring buildings and interior spaces to provide as-built drawings. We charge per square foot for these services based on a \$35.00 per hour rate.

Hourly Rates for services:

- Mid-level - For standard mark-ups and generic CAD transfers - \$35.00
- Senior level – For advanced CAD transfers and project coordination - \$40.00

Availability – we pride ourselves on being available to assist you on a project with very little notice. Many project that we are called on to assist M&E engineers with happens within (1) day of requesting the work. We are very flexible and manage our people to service the needs of our clients.

M&E engineers have used our services and continue to use are services because they see the benefits of using National CAD Services as part of there company. They value the quality service, quick turn around time and money saved on each project.
